b. In Great Britain after about 1850, the word became current in the designation *co-operative store*, denoting the shop in which a co-operative trading society exposes goods for sale (originally to its own members only, but later usually also to the outside public). Commonly in *plural* ('The Stores'), applied esp. to the establishment of any of the larger London co-operative societies, consisting of a number of departments, each dealing in a separate class of goods. In imitation of this use, the plural ('——'s Stores', '—— & Co.'s Stores') was often adopted as the designation of a trading establishment resembling 'The Stores' in extent and in multifariousness of business.

d. ***storm and stress*** [G. *Sturm und Drang*]: used to designate the movement in German literature about 1770–82, due to a school of young writers characterized by extravagance in the representation of violent passion, and by energetic repudiation of the 'rules' of the French critics. See also STURM UND DRANG.

Sturm und Drang, the title of a play by F. M. Klinger (1776), was seized upon by the historians of literature as aptly expressing the spirit of the school to which the author belonged.

LEWES *Goethe* I. iii. i. 140 [1771] The period known as the Storm and Stress period was then about to astonish Germany, and to startle all conventions, by works such as Gerstenberg's *Ugolino*, Goethe's *Götz von Berlichingen*, Klinger's *Sturm und Drang* (from whence the name), and Schiller's *Robbers*. **1900** F. story, *sb.*[2], **storey** ('stɔəri). Pl. stories, storeys. Forms: 5 storye, 6 storie, (storrie, store), 7- storey, ? 4, 5- story. [First in AL. form *historia*; hence prob. the same word as STORY *sb.*[1], though the development of sense is obscure.

Possibly *historia* as an architectural term may originally have denoted a tier of painted windows or of sculptures on the front of a building: see STORY *sb.*[1] 8, and cf. the Latin quot. 1398 below and sense 2.

The current view that the word is a. OF. **estoree* (f. *estorer* to build, furnish: see STORE *v.*) is untenable on account of the AL. form *historia* (from 12th c.).

The following are examples of the Anglo-Latin use of *historia* in the architectural sense:—

1. Each of the stages or portions one above the other of which a building consists; a room or set of rooms on one floor or level.

In this use synonymous with FLOOR *sb.* 5; but while in England the term FIRST-FLOOR is applied to the floor above the ground-floor, the numbering of 'stories' (so named) usually begins with the ground floor, so that the 'first-floor' is identical with the 'second story,' and 'a house of one story' has a ground-floor only. A different usage is shown in quot. 1850, and appears to be not wholly obsolete.

Quot. *a* 1400, though the reading is app. the scribe's conjectural emendation of an obscure passage, may perh. be taken as attesting the existence of the sb. at the date of the MS.; the passage was prob. supposed to refer to the addition of 'stories' or upper stages to towers.

21. *to strain at*: to make a difficulty of 'swallowing' or accepting (something); to scruple at. Also (rarely), † *to strain to do* something.

This use is due to misunderstanding of the phrase 'strain at a gnat' in Matt. xxiii. 24. It has been asserted that 'straine *at*' in the Bible of 1611 is a misprint for 'straine *out*', the rendering of earlier versions (see 14 e). But quots. 1583 and 1594 show that the translators of 1611 simply adopted a rendering that had already obtained currency. It was not a mistranslation, the meaning intended being 'which strain the liquor if they find a gnat in it'. The phrase, however, was early misapprehended (perh. already by Shaks. in quot. 1609), the verb being supposed to mean 'to make violent effort' (see sense 18).

strand (strænd), *sb.*[2] Chiefly *Sc.* and *north.* Forms: 3, 6 strond, strund, 4 stronde, 3- strand. [App. connected with STRIND[2], though the phonological relation is obscure.

The first quot. is from a work belonging to a group of writings (the 'Katharine group'), which show a curious mixture of midland and even northern forms with their markedly southern dialect. (The regular Southern form *strund* occurs in the same text.) Otherwise the word is purely northern, exc. for its occurrence in the Wyclif Bible and in Wyclif's sermons, and once in Spenser (who may have imitated Douglas).]

stratus ('strɑːtəs, 'streɪtəs). *Meteorol.* [a. L. *strātus* (*u* stem), f. *strā-*, *sternĕre* to spread, lay down. (See quot. 1803, and cf. STRATUM.)] One of the simple forms of cloud, having the appearance of a broad sheet of nearly uniform thickness, usually existing at low elevations.

1803 L. HOWARD *Modif. Clouds* (1865) 4 *Stratus*, a widely extended, continuous, horizontal sheet, increasing from below upward. *footn.* This application of the Latin word *stratus* is a little forced. But the substantive *stratum*, did not agree in its termination with the other two [*cirrus*, *cumulus*], and is besides already used in a different sense even on this subject, e.g. a stratum of clouds; yet it was desirable to keep the derivation from the verb *sterno*, as its significations agree so well with the circumstances of this Cloud. **1831** BREWSTER *Nat. 2. Phrases. a. *to make bricks without straw*: said with allusion to *Exodus* v.

The current form and application of the saying are hardly justified by the narrative. The Israelites were not required to make bricks without straw (which was an indispensable binding material for sun-dried bricks), but to gather the straw for themselves instead of having it furnished to them. The phrase, however, now commonly means 'to be required) to produce results without the means usually considered necessary'. Cf. the accurate use in quot. 1661.

1658 in *Verney Mem.* (1907) II. 79 It is an hard task to make bricks without straw. **1661** DK. ORMONDE in *11th Rep. Hist. MSS. But your task from to-day will be to make bricks without straw. No appeal shall induce me to have pity on you.

b. *in the straw*: in childbed, lying-in. So *out of the straw*, recovered after childbearing.

In quot. 1786 the phrase is taken to refer to the practice of laying down straw (to deaden noise) before a house where there is a confinement. It is doubtful whether this was the original meaning, though the practice was common.

One explanation refers the first element to STRAW *sb.*[1] 2, a particle of straw or chaff, a mote, describing the appearance of the achenes scattered over the surface of the strawberry; another view is that it designates the runners (cf. STRAW *sb.*[1] 3).

The view of Kluge, that OE. *stréaw-* in *streawberiȝe* is cogn. w. L. *frāgum* strawberry, is not phonologically satisfactory, and is also open to objection on other grounds.]

streamline, *sb.* Also stream-line.

1. *Hydrodynamics* and *Aerodynamics.* a. (See quot. 1906.) In mod. use, a line such that, at any instant, the direction of the tangent at any point is the direction of the flow of fluid at that point. (This definition is equivalent to that in quot. 1906 for the special case of steady flow.)

1868 W. J. RANKINE in *Engineer* 16 Oct. 285/1 A stream-line is the line, whether straight or curved, that is traced by a particle in a current of fluid. **1873** J. C. MAXWELL *Electr. & Magn.* §648 II. 260 If ϕ is constant for any curve, there is no current across it. Such a curve is called a Current-line or a Stream-line. **1882** MINCHIN *Unipl. Kinematics* 151 When the motion becomes steady, each line of flow becomes the actual path of a fluid particle, which is called a stream-line. **1906** HOR. LAMB *Hydrodynamics* (ed. 3) 17 A 'line of motion' or 'stream-line' is defined to be a line drawn from point to point, so that its direction is everywhere that of the motion of the fluid. *Footnote*, Some writers prefer to restrict the use of the term 'stream-line' to the case of steady motion. **1945** R. VON MISES *Theory of Flight* ii. 23 In the case of an unsteady flow the streamlines, *i.e.*, the curves whose tangents have the velocity direction are, in general, not the pathways of the particles. **1971** G. M. HIDY *Waves* iv. 47 Streamlines generally bear no relation to particle paths because different fluid elements form different streamlines at given times. **1980** BOBER & KENYON *Fluid Mech.* iv. 124 If the flow is steady then a fluid particle will move along a streamline.

b. *attrib.* (*a*) Designating motion of a fluid that is free from turbulence, so that it can be represented by a pattern of streamlines that either is constant or changes steadily with time.

LYDERSEN *Fluid Flow & Heat Transfer* i. 2 This type of motion, where the velocity at a certain point is constant and independent of time, is termed laminar flow. It is sometimes called streamline flow or viscous flow.

(*b*) Having or being a shape such that the flow of a fluid round it is smooth, and there is no separation of streamlines from the surface; more widely, shaped so as to reduce air or water resistance; ***streamline wire***, a wire of elongated cross-section.

1907 F. W. LANCHESTER *Aerodynamics* i. 20 In an actual fluid, bodies of other than streamline form experience resistance apart from that directly due to viscosity. *Ibid.* iii. 102 In the hydrodynamic theory of an inviscid fluid, every conceivable body is of stream-line form. **1909** C. C. TURNER *Aerial Navig. To-day* viii. (1910) 131 Bodies having 'streamline' form present the least resistance to the air. b. With prefixed word, forming the proper name of a street. Abbreviated *St.*, *st.*

In early examples these appellations were originally descriptive, as in *the Broad street*, *the* HIGH STREET. (In some towns, a name of this type still retains the definite article.) In modern nomenclature, the choice of the prefixed word is often arbitrary.

Modern usage is divided as to the writing of these names with hyphen or as two words. (In the 16-17th c. they were not unfrequently written as one word, e.g. 'Limestreete', Stow *Surv.* ed. 1603, p. 152.) It is to be observed that names ending in *street* are always stressed on the prefixed element, while those ending in *road* or *lane* have level stress: cf., e.g., *'Park-street* with *'Park-'lane*, *'Park-'road*.
